Even our onsite service and repairs are per formed to the best interest our clients.

APPROACH

IS YOUR STAND-BY IN GOOD ORDER?

With virtually every organization reliant either wholly or in part on computer systems, loss of data can prove catastrophic, the result being loss of revenue, or in the case of hospitals, nursing homes and similar establishments, could even mean loss of life. Maintenance is the key to ensuring your system performs when needed to keep the critical elements functioning when the power fails. Most people just don't have the time, equipment or experience to do the job properly and at best they hopefully give the set a run now and again. Consequently when an emergency does arise, for any one of a number of faults liable to occur when the equipment is only intermittently used, the set just won't start. Yet it is a simple job, if it is in the right hands. SUPER GEN LANKA ENGINEERING SERVICE have good experience, expertise and have engineers throughout the country capable of maintaining installations of any size in any location in the Sri Lanka

BENEFITS

There are amazing benefits that can make your business more successful than ever before. With our assistance, you will be on the safe side of sudden electrical power interruptions.

IMPLEMENTATION PLAN

Should I consider a Service / Maintenance Contract ?

Yes. Service contracts purchased through Super Gen Lanka assure that your emergency standby generator will always run at peak efficiency with our experiences in this business have

METHODOLOGY

Super Gen Lanka fully understands that power failure, close down and maintenance might cause several losses to the customer. Under our new service regime, we have local service agents that enable users to standardize maintenance and repair process and make it more efficient. Local service agents provide with a variety of solutions, such as: products and services, maintenance consulting and training on operation. In this way, it ameliorates operating performance and reduces maintenance costs. Super Gen Lanka has quality assurance as follows:

- Whole product technical information.
- On time delivery and timely guidance to installation and adjustments
- Regularly training for engineers and technical staff Maintenance consulting
- Creating a customer file for regular visits
- Storage of accessories and spare parts
- Life-long technical service and original spare parts

SCHEDULE

The set will be visited by our Senior Technicians every 3,4 or 6 months dependant on your specific requirements.

The set will be thoroughly tested electronically and mechanically prior to load per visit. The set will be allowed to run off load for a short cooling period, then shut down. Water, oil and battery levels will be topped up on completion of testing.

Fuel and air filters to be changed per manufacturers recommended intervals. We recommend that lead acid batteries be changed every three years. (See separate Policy Statement).

We offer a 24 hour, 365 day emergency service, with a 4 hour response time. A 'Last call' card is affixed to each machine, giving the date when it was last serviced, our emergency telephone number, and on the back, the Area Engineer and Back-up Engineers name and mobile telephone numbers.

It has been normal policy until recently to change lubricating oil and oil filters every 250 hours or every 6x months.

RESOURCES

We have most experienced qualified Engineers and Technicians with management and with our well equipped professionals in the field of power engineering. Super Gen Lanka maintains an internal spare parts department that operates at least 56 hours per week in order to expedite customer's request in a timely manner. Computerized cataloguing of coded parts, adequately maintained stock and specialized personnel, enables us to respond to customer's requests very quickly. Spares are assured for the entire economic life span of the machinery supplied

Servicing program should include two full services and two routine

Full services include following.

- Supplying and replacing fuel filter.
